

FOR IMMEDIATE RELEASE

CEDIA Expo Booth #26091

STORMAUDIO WINS CEDIA 2022 BEST NEW PRODUCT

Dallas, TX United-States, September 30, 2022 — StormAudio (stormaudio.com) is very pleased to announce that they have won the CEDIA 2022 award for Best New Product for their **ISP Elite MK3 32 Digital AoIP**.

This product is unique on the residential market as it is the only processor capable of outputting 32 channels of AoIP.

AoIP is a proven technology that provides a zero-latency redundant network, allowing for easy transport of audio signals without loss. StormAudio's deployment allows the processor to communicate with a host of Dolby, Dante, Ravenna, Livewire, Q-Lan, and other AES67 compatible devices. Deployment is fast and easy using our web-browser based configuration GUI.

The CEDIA 2022 Best New Product is on display at StormAudio's Booth 26091 as well as the **Core 16** and **MK3 PA 16** and **PA 8 Ultra amplifiers**. And two brand-new products have been unveiled, the **ISP Evo** digital immersive AV preamp processor and **ISR Fusion 20**, the ultimate immersive AV integrated amp processor with 20 channels decoding and 16 channels of amplification. If you are visiting CEDIA, stop by the booth to learn more about these exciting products.

In addition to the main booth, StormAudio is featured in several active demos throughout the show: Sound Room 2 with Seymour-Screen Excellence and other partners; Wisdom Audio/Quantum Media Systems, Arts District Room 7 on Omni Causeway; Pro Audio/Theory Audio Design Booth #24035; and Sony Booth #16001.

ABOUT STORMAUDIO

Immersive Audio Technologies designs and manufactures high-quality audio amplifiers and processors in France, globally distributed under its primary brand StormAudio. The passion to deliver superior audio electronics is what drives the company. With headquarters in France and worldwide presence through its US subsidiary and Hong Kong office, Immersive Audio Technologies aims to provide premium technical and customer support to its customers from fit to finish, at every stage of a project.
